May 31, 2019

The Rhode Island Joint Reinsurance Underwriting Association (RIJRA), has updated its risk assessment and valuation program to CoreLogic RCT Express version 4.5. This upgrade has been in use in the voluntary market being received with positive review. RCT Express version 4.5 contains several updates which make it both intuitive and allow for more detail ensuring the most accurate valuation possible.

One of the most significant changes will be the interface which is a simple to use dashboard allowing you to easily navigate the valuation. A notable change is Pre 1930 & Pre 1940 construction types are being amended to vintage construction.

In addition, the upgrade will commence the evening of May 31st and will be completed by June 3rd. During the upgrade any in progress valuation may be lost and not recoverable however all completed valuations will migrate to the new version.

If needed, CoreLogic provides an online RCT Express help page containing training videos and manuals. This page is available within the CoreLogic dashboard under the help tab.

Should you have any questions regarding this update, please contact RIJRA's Consumer Service Department.
